

HICKMAN

an MTL company

PRE-ENGINEERED EDGE METAL SOLUTIONS

**Streamlining your projects.
Satisfying your customers.**

REDUCING LABOR COSTS & GROWING YOUR PROFITS

Finding the right products that will meet the building requirements, fit within your schedule, and most importantly reduce your labor time can make a big difference to your bottom line. This is especially true in the case of roofing—one of the last steps in the construction process, when time is at a premium.

Contrary to your typical shop fabricated metal, Hickman's pre-engineered roof edge systems are designed to maximize contractor efficiencies. With a simple installation process, provided fasteners with all major products, and little on-site fabrication required, you can move on to your next project quicker.

Learn more about our roof edge and for your next project by visiting www.hickmanedgesystems.com or contact a roofing specialist at 828-676-1700.

**FASCIA | COPING
WOOD NAILER ALTERNATIVES
WATER CONTROL | ACCESSORIES**

We help you stay on schedule with multiple manufacturing facilities and on-hand standard inventory to get your product in your hands sooner, and a nationwide support network. And it all comes with the confidence of being backed by the best wind and performance warranties in the industry.

With Hickman Edge Systems, you keep your project moving, your customers happy and your bottom line strong.

**THE INDUSTRY'S LARGEST
PORTFOLIO OF TESTED
ROOFING AND BUILDING
ENVELOPE SOLUTIONS.**

TERMINEDGE FASCIA PRODUCTS

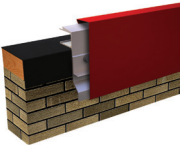

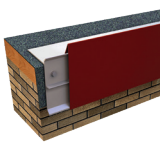

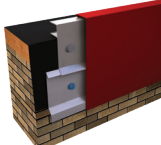

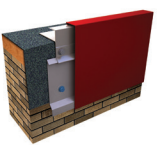

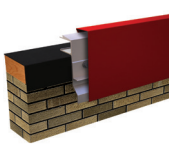

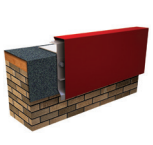

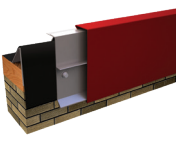

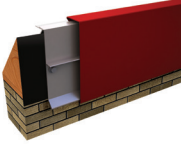

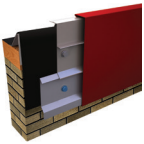

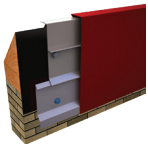

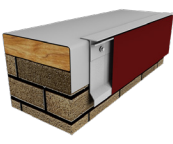

Hickman's TerminEdge fascia products combine custom engineering and superior performance with an attractive appearance.

The patented design of our extruded aluminum anchor bar on TerminEdge EX, XT, HG, and Canted Fascia, securely terminates the membrane—providing protection superior to any other shop-fabricated roof edge. Simplify your projects with the high quality, economical prices, and quick-to-ship convenience you will get with our TerminEdge and TerminEdge One fascia products.

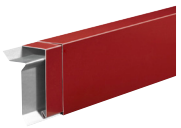

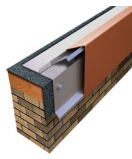

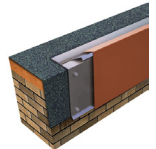

TERMINEDGE FASCIA ADVANTAGES

- Includes manufacturer's wind warranty
- Simple, snap-on cover; no crimping needed on most fascia products
- Eliminates stripping-in or heat welding on most fascia products
- Manufactured in 12' lengths with pre-punched holes to reduce installation time
- Multiple colors, materials, and sizes available
- Includes all fasteners to ensure proper install and lower material costs

5-STEP EASY INSTALLATION TerminEdge One Fascia (Single-Ply)

STEP 1

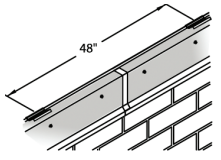

Place membrane over roof edge, fully covering nailer.

STEP 2

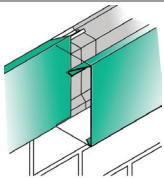

Apply sealant to rail (shown with inside face up).

STEP 3

Fasten base rail to nailer through provided slots.

STEP 4

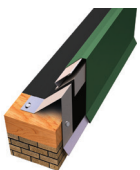

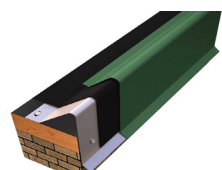

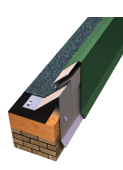

Place spring clips every 4 feet on-center (typical).

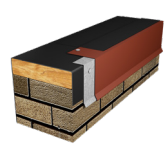

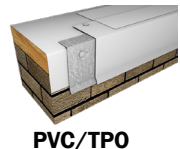

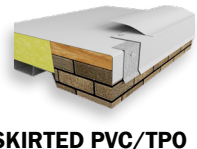

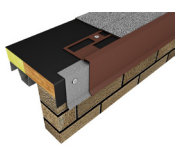

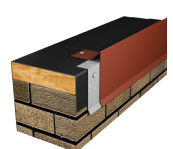

STEP 5

Remove protective film from cover; snap onto base rail.

ELIMINAILER-T & EDGEBOX RI

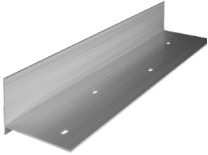

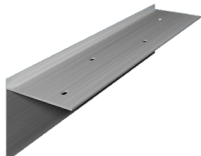

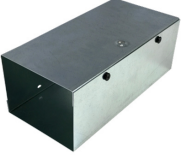

Hickman’s wood nailer alternative products make using a wood nailer obsolete. The roof perimeter and corners serve as the first line of defense against severe winds, rain, hail, storms, tornados, hurricanes, and much more. If the edge fails, the entire roof system is in jeopardy.

Replacing old wood nailers at the building perimeter with Eliminaailer-T or EdgeBox RI significantly reduces the risk of failure and helps protect the entire roof system from costly damages and blow off.

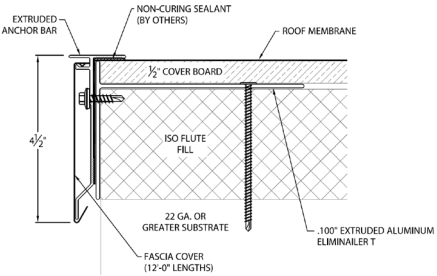

WOOD NAILER ALTERNATIVE ADVANTAGES

- Includes manufacturer’s wind warranty
- Made with heavy gauge materials that will not warp, crack, split, rot, or deform
- Easy, precise installation with pre-punched holes and fasteners, installing faster than wood nailer
- Continuous insulation to the roof edge
- Used for a variety of applications including simplifying metal roof retrofit projects

PERMASNAP COPING

Proven Protection and a Perfect Fit

Continuing a tradition of innovative, rigorously tested roof edge systems, PermaSnap coping products are a fine complement to your building's natural aesthetics. A variety of options, including standard and custom colors as well as anodized finishes, accommodate multiple roof conditions. It's exactly what you need for your building: the right design, the right quality, the right price—and easy to install.

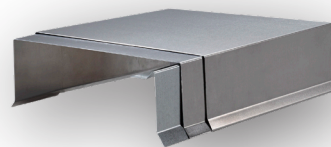

PERMASNAP ADVANTAGES

- Includes manufacturer's wind warranty
- Reduces labor time and costs with simple, snap-on installation
- Prefabricated miters, fasteners, and accessories ensure proper fit and eliminates field fabrication
- Facilitates correct placement and proper thermal movement with slotted fastening holes

ROOFER'S EDGE COPING

Coping with Your Budget, Schedule, and Time in Mind

Developed with contractors in mind, Roofer's Edge Coping is a great alternative to shop-fabricated coping – economically priced, yet made to exacting standards. Our fast lead times and easy installation translate directly into decreased labor costs and enable you and your team to move on to other projects more quickly.

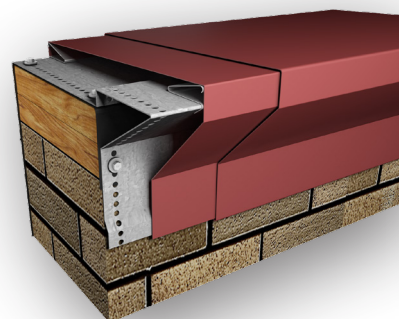

ROOFER'S EDGE ADVANTAGES

- 10 Year, 90 MPH Wind Warranty
- Versions: Tapered, Flat, Existing Slope
- Cover Materials: 24 ga., or 22 ga. Steel and .040", .050", or .063" Aluminum
- ANSI/SPRI/FM 4435/ES-1 tested

CREATIVE DESIGN SERIES

Design-Friendly Options to Match Your Building

Creative Design Series is perfect for any commercial building. With its unique designs, it is sure to complement any high-profile building projects.

CDS COPING ADVANTAGES

- 20 Year, 120 MPH Wind Warranty
- Versions: Box Face, Bullnose, Cornice, Leak-Tite, Shadowline, Stone-Look
- Looks great without complicated installation
- Prefabricated miters and accessories ensure proper fit and eliminate field fabrication
- Shadowline Coping: ANSI/SPRI/FM 4435/ES-1 Tested (Up to 16" Wall Width)

WATER CONTROL

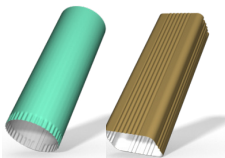

Superior Water Drainage in Any Weather Conditions

Unique design, superior roof drainage, and attractive appearance make Hickman Wind Resistant Gutters and downspouts stand out from the crowd. Hickman Wind Resistant Gutters are specifically engineered and tested to meet the requirements of the ANSI/SPRI GT-1 Standard for Gutter Systems Used with Low-Slope Roofs. The design incorporates a 1" wide extruded internal gutter hanger for strength and support. It also reduces the torque of the metal with expansion and contraction in temperature changes.

WATER CONTROL ADVANTAGES

- Includes manufacturer's wind warranty
- ANSI/SPRI/GT-1 tested to comply with International Building Code (Wind Resistant Gutters ONLY)
- Slotted fastening holes to ensure correct fastener placement and spacing
- Prefabricated miters, fasteners, and accessories ensure proper fit and eliminates field fabrication

THE INDUSTRY'S BEST WARRANTIES

Guaranteeing the Safety of Our Customers, Friends, & Family

Because every Hickman product is carefully designed, fabricated, and tested, we stand by our quality with industry leading wind and performance warranties. Hickman warranties are for replacement or repair of any portion of the system that has failed due to a defect in Hickman supplied materials. Covers the roof edge for the number of years listed on the roof on which it was originally installed.

REGIONAL TECHNICAL SERVICES

Complimentary Field Measurement, Takeoffs, & Training

Hickman's Regional Technical Services team is a nationwide team of technicians available to customers for complimentary measurements, job ordering, and training for contractors.

- Save time and money when our experts measure and order your jobs, reducing/eliminating errors
- Field measurement details provided by RTS protects the installing contractor from mismeasurement
- Ensure proper coverage of challenging components
- Expert technical advice on-site at no charge
- Products comply with ANSI/SPRI ES-1, FM, Miami Dade, and Florida Building Code for IBC compliance

THE FALCON ROOF MEASUREMENT TOOL

New Technology Revolutionizes Approaching the Roof Edge

Only available through our nationwide RTS team, The Falcon Roof Measurement Tool expedites the entire process of measuring the roof perimeter, including quoting, delivery, and installation.

- Creates an illustrated roadmap to improve speed, efficiency, and accuracy of installation
- Precision within thousandths of an inch and tenths of a degree
- Hybrid clamping device accurately measures all parapet surfaces
- Radius, miters, transitions, end walls, and other unique and difficult details are simple to measure
- Labor savings increases capacity and gets you off the roof faster
